**KENTUCKY CPH REQUIREMENTS**

1. Owned by seller a minimum of 60 days.
2. Weaned a minimum of 45 days.
3. Trained to eat feed from a bunk and drink water from a trough. (Do not overfeed; fleshy calves should be avoided and are likely to be discounted.)
4. Dehorned and healed (no visible horns or scurs).
5. Males castrated and healed (knife castration is strongly recommended). Late castrated calves may lead to stags, which are discounted. *The scrotal sac with testicles must have fallen off "banded" calves.*
6. Treated for grubs and lice according to label recommendations for time of year.
7. Dewormed with an endectocide a maximum of 60 days before the sale or 100 days, if using LongRange®.
8. Vaccinated for Clostridia (7-way) subcutaneously in the neck.
9. Vaccinated and boosted for IBR, PI<sub>3</sub>, BVD, and BRSV (booster injection for viral diseases must be modified live vaccine)
10. *Vaccinated for *Manheimia haemolytica* (pasteurella)*

**Note: All vaccines are boosters must be administered no more than 90 days and at least 14 days prior to sale. (See chart below for yearling cattle).**

11. All processing recorded on body map and chart on CPH certificate.
12. Identified with official Kentucky CPH tag.
13. Heifers are guaranteed open at time of sale and steers are guaranteed not to be bulls. Seller agrees to reimburse buyer \$200.00 for pregnant heifers or intact bulls. All claims must be properly verified by a veterinarian within *four (4) months* of sale.
14. Calves must have access to a free choice mineral supplement which contains a minimum *1,400 ppm copper* (no copper oxide), *26 ppm selenium*, *3,000 ppm zinc*, *3,000 ppm manganese* and 18- 25% salt based on a 4 oz. daily intake. No other salt available.

**BACKGROUNDING OPTIONS – Check if this applies**  
 (calves weaned a minimum of 90 days before sale)

1. Same requirements as above except that backgrounded cattle do not have to be revaccinated prior to sale provided they were vaccinated and boosted according to label guideline time limits for the diseases listed above in item 9. Backgrounded cattle must meet the guidelines in item 7 (dewormed with an endectocide maximum of 60 days before the sale or 100 days, if using LongRange®).
2. Grub and lice treatment according to label recommendations for time of year.

I certify that the cattle represented on this certificate adhere to the above requirements and that this record is accurate.

\_\_\_\_\_  
 Signature of Owner Date

I certify that *I have inspected the cattle* represented on this certificate and they were observed to be weaned, eating feed from a bunk and drinking water from a trough or conform to the backgrounding requirements. *They are being fed a mineral supplement that meets the requirements listed above.*

\_\_\_\_\_  
 Signature of County Extension Agent Date

OPTIONAL (Owners are responsible for checking and adhering to local sale requirements) I have a valid veterinarian-client-patient relationship with the cattle and their owner and certify this record to be accurate.

\_\_\_\_\_  
 Signature of Veterinarian Date

**PROCESSING MUST BE RECORDED ON REVERSE OF CERTIFICATE**

Photocopy certificate if copies are required for records. Contact County Extension Agent for Agriculture for inspection.

## TOTAL QUALITY MANAGEMENT PRECONDITIONING PROCESSING MAP

All injections should be given in front of the shoulder and subcutaneously when possible.
