CENTRAL KENTUCKY FEEDERS REQUIREMENTS

1. Weaned 45 days (Minimum).
2. Dehorned and healed (no visible horns or scours).
3. Males castrated and healed (knife castration is strongly recommended). Late castrated calves may lead to stags, which are discounted. The scrotal sac with testicles must have fallen off "banded" calves.
4. Dewormed with a product effective against inhibited ostertagia, grubs and lice, a maximum of 60 days before the sale or 100 days if using long range.
5. Pre-Weaning Vaccination:
 - *Initial Shot ~ 4-Way*
 - *4-Way clostridia with somnus*
6. Post-Weaning Vaccination
 - 4-Way MLV (modified live) & 7-Way Clostridia with Somnus
 - **If using Bovishield Gold/Oneshot – Pasteurella Covered ****
7. All cattle must receive MLV (modified live) booster for clostridial and 4-Way (As per products required):
Vision 7 Somnus and Bovi Shield 5
8. *OPTIONAL* If implanted, recommended products are Ralgro or Synovex S or H.
9. All processing recorded on body map and chart on CPH certificate (reverse side).
10. Identified with official CPH 45 tag (Received from KY Beef Network).
11. Heifers are guaranteed open at time of sale and steers are guaranteed not to be bulls. Seller agrees to reimburse buyer \$200.00 for pregnant heifers or intact bulls. All claims must be properly verified by a veterinarian within four (4) months of sale.
12. Cattle must be enrolled 14 days prior to sale date.
13. Retain proof of purchase of vaccines.
14. Producer must be BQA certified (check with Extension Agent).
15. Calves must have access to a free choice mineral supplement which contains a minimum 1,400 ppm copper (no copper oxide), 26 ppm selenium, 3,000 ppm zinc, 3,000 ppm manganese & 18-25% salt based on a 4 oz. daily intake. No other salt available.

(PLEASE FLIP OVER AND SIGN AT BOTTOM)
